

1. **Week 1 Assignment: E-Commerce Site Analysis**
2. Student: Enis Ögdüm

WIKIPEDIA-January 15, 2001

LOCATION:

Wikipedia was established in January 2001 in St. Petersburg, Florida, by Jimmy Wales and Larry Sanger. Today, it is operated by the non-profit Wikimedia Foundation, which has its headquarters in San Francisco, California, USA.

OFFERING:

Wikipedia's purpose is to serve readers as a widely accessible, free encyclopedia that provides information across all branches of knowledge. It is hosted by the Wikimedia Foundation and built on freely editable, community-driven content. Articles are interlinked with numerous references and hyperlinks, guiding readers to further sources and related topics.

OPERATING MARKET:

- **Geographical reach:** Global, accessible almost everywhere in the world.
- **Languages:** Available in over 300 language editions.
- **User access:** Free of charge, open to anyone with an internet connection.

Wikipedia functions as a global knowledge platform, providing free access to information in more than 300 languages. Its broad linguistic coverage and open-access model make it one of the most inclusive and widely used online resources, ensuring that readers and contributors from around the world can participate.

CUSTOMERS:

Wikipedia serves a diverse audience worldwide, which can be divided into three main groups. **First**, students, educators, researchers, and other primary users access content for learning, research, and knowledge-seeking purposes. **Second**, volunteer contributors create and edit articles, ensuring that the platform remains accurate and up to date. **Third**, casual users visit occasionally for quick reference or general information. This division highlights the different ways people interact with Wikipedia and the distinct roles they play in sustaining its ecosystem.

- **Primary readers/users:** Consume content for education, work, or personal interest.
- **Contributors/volunteers:** Actively create or edit content; they are essential for Wikipedia's operation.
- **Casual/other users:** Visit occasionally, explore links, or use the site for quick reference.

SOURCE OF INCOME:

Wikipedia generates revenue primarily through donations from individual users, which are solicited during annual fundraising campaigns. In addition, the Wikimedia Foundation receives grants from philanthropic organizations and technology companies that support open knowledge initiatives. These diverse funding sources allow Wikipedia to remain free and ad-free, ensuring that its content is accessible to everyone without subscription fees.

WHY I LIKE WIKIPEDIA:

As an individual student, the most important reason I like Wikipedia is that it is completely free of charge. I have been using it since my childhood, and with my limited budget, it has always been a reliable companion for learning. Wikipedia also supports freedom of expression, allowing humanity to share ideas openly and access knowledge without restrictions. Furthermore, the site is well-organized, with clear structure and navigation for every topic, which makes finding information easy and efficient.

Gezi Park protests	
	
Protests on 6 June, with the slogan "Do not submit"	
Date	28 May – 20 August 2013 ^[1] (2 months, 3 weeks and 3 days)

Caused by	• <i>Authoritarianism of Recep Tayyip Erdoğan</i>^{[5][6]} • <i>Lack of public consultation</i>^[7] • <i>Violation of democratic rights</i>^[8] • <i>Media censorship and disinformation</i>^[8] • <i>Use of excessive force by police</i>^{[6][8][9]} • <i>Government policies connected to the Syrian Civil War</i>^[10] • <i>Alcohol restrictions</i>^[11] • <i>Center-periphery dissonance</i>^[12]
Goals	• <i>Protecting Gezi Park and the public places</i> • <i>Defending freedom of speech and right to assembly</i> • <i>Banning the usage of chemical gas by state forces against protesters</i>

Marriage to Muhammad

Muhammad reportedly stated that he saw Aisha twice in his dreams, being carried in a silk cloth by an angel who told him she would be his wife. He believed that if the dreams were from God, they would come true.^{[18][19]} Following the death of his first wife, *Khadija bint Khuwaylid*, his aunt *Khawlah bint Hakim* suggested that he marry Aisha.^{[20][21]} Aisha's father *Abu Bakr* was at first unsure about marrying his daughter to Muhammad; he thought they were brothers. Muhammad clarified that they were merely brothers in religion, and it was legal for him to marry Aisha.^{[22][21]} Aisha's engagement to Jubayr ibn Mut'im, a boy close to her age, was then annulled.^{[23][21]} Orientalist *W. Montgomery Watt* suggests that Muhammad hoped to strengthen his ties with Abu Bakr;^[24] the strengthening of ties commonly served as a basis for marriage in Arabian culture.^[25]

All extant hadiths agree that Aisha was married to Muhammad in Mecca, but that the marriage was not consummated until the month of *Shawwal* following his *hijrah* to Medina, in April 623.^[26] Some classical sources, however, state that the marriage itself took place in Medina, without mentioning any delay in consummation.^[26]

Age at marriage and consummation

Classical Islamic sources state that Aisha was six at the time of her marriage with Muhammad and nine at the time of its *consummation* (then 50 or 53). In a hadith recorded in *Sahih al-Bukhari*, Aisha recalls being married at the age of six.^[27] *Ibn Sa'd*'s biography holds her age at the time of marriage as between six and seven, and gives her age at consummation to be nine while *Ibn Hisham*'s biography of Muhammad suggests she may have been ten years old at consummation.^[28] *Al-Tabari* notes Aisha to have stayed with her parents after the marriage and consummated the relationship at nine years of age since she was young and sexually immature at the time of marriage.

Ottoman miniature depicting Khawlah bint Hakim proposing the marriage between Muhammad and Aisha, from the 16th-century *Siyer-i Nebi* manuscript, produced in Constantinople and now held in the Topkapı Palace Museum, Istanbul

ALIEXPRESS-2010

LOCATION:

AliExpress was established in 2010 as part of the Alibaba Group, with headquarters in Hangzhou, Zhejiang, China. It operates as a global online marketplace connecting sellers primarily in China with buyers worldwide.

OFFERING:

AliExpress is a general online marketplace offering a wide range of products, including electronics, fashion, home appliances, toys, beauty items, and more. While primarily focused on physical goods, it provides international shipping and buyer protection, making it accessible to customers worldwide.

- **Electronics & Gadgets:** Smartphones, accessories, computers, smart watches.
- **Fashion & Apparel:** Clothing, shoes, and accessories for men, women, and children.
- **Home & Garden:** Furniture, kitchen appliances, décor, and gardening tools.

OPERATING MARKET:

Even though AliExpress is headquartered in China, it serves customers worldwide—from babies to older adults. However, the platform sometimes faces challenges reaching certain countries due to factors such as taxes (e.g., in the USA) or regions where shipping is not available. Furthermore, AliExpress mainly attracts retail customers looking for affordable products.

- **Global Reach:** Customers from almost any country can access AliExpress.
- **Age Groups:** Serves all age groups, from children (toys, baby items) to older adults (home goods, electronics).
- **Customer Type:** Mainly retail customers, but also small businesses and resellers.
- **Regional Limitations:** Some countries face shipping restrictions or high taxes (e.g., USA), limiting full accessibility.

CUSTOMERS:

Even though AliExpress is headquartered in Asia, most of its customers come from Spain and the USA. Around 29% of users are aged 25–35, meaning the platform primarily attracts middle-aged adults who shop for convenience and affordability. It appeals to budget-conscious individuals across all age groups, while also serving small businesses and resellers looking to source products for resale. Overall, AliExpress combines a wide demographic reach with a strong focus on adults seeking variety and value.

SOURCE OF INCOME:

AliExpress earns most of its revenue from marketplace commissions on seller sales (about 55%). Seller services, such as advertising and premium store features, contribute around 30%. Logistics and supply chain fees, including shipping and fulfillment services, make up 10%, while payment processing fees account for 3%. The remaining 2% comes from other sources like customs/VAT management and B2B services.

WHY I LIKE WIKIPEDIA:

I like AliExpress because it offers an almost unlimited variety of products, giving millions of opportunities to find what you need. If your country doesn't impose high taxes, it remains a very budget-friendly site. Even for items shipped from distant countries, delivery is relatively fast, allowing you to receive your orders quickly and conveniently.

BOLT-2013

LOCATION:

Bolt is an Estonian company headquartered in Tallinn, Estonia. In Poland, it operates in major cities such as Warsaw, Kraków, Wrocław, and Gdańsk, providing ride-hailing, scooter, bike, and food delivery services. While its headquarters are in Estonia, Bolt's operations in Poland are locally managed and adapted to urban commuters' needs.

OFFERING:

Bolt offers a wide range of services to its customers — from food delivery to scooter rentals, and even taxi rides. Despite providing all these options, it maintains very reasonable prices, which makes it highly popular in Poland, especially among students.

OPERATING MARKET:

Even though Bolt has numerous offices and employees across Europe, its main operational focus is in Poland. The company strongly promotes the use of electric vehicles, which enhances its popularity throughout Europe. Bolt's commitment to sustainability and affordability has made it a preferred choice among environmentally conscious customers, especially students and young professionals.

- **Geographical Presence:** Operates in many European countries, with a strong base in Poland.
- **Sustainability Focus:** Promotes electric vehicles to reduce carbon emissions.
- **Customer Type:** Popular among students, commuters, and eco-friendly individuals.
- **Market Expansion:** Continues to grow across Europe by integrating affordable mobility and delivery solutions.

CUSTOMERS:

Bolt is used by a wide variety of people, including the elderly, young adults, and those in middle age. Everyone uses it according to their specific needs. For instance, workers often choose scooters to reach their offices quickly, students prefer bicycles to get to school, and older adults use taxis to travel home or wherever they need to go.

SOURCE OF INCOME:

Bolt primarily generates revenue through commission fees on rides and deliveries. Additionally, the company earns income from e-scooter and car rentals, franchise fees, software subscriptions for business partners, and advertisements featured within its app.

- **Main Revenue Stream:** Commission fees from rides and deliveries.
- **Additional Income Sources:** E-scooter and car rentals, franchise partnerships, and software subscriptions.
- **Advertising:** Revenue from in-app advertisements and promotional collaborations.

WHY I LIKE WIKIPEDIA:

As a student, Bolt offers very reasonable and affordable prices. For example, a 30-minute scooter ride usually costs only about 5–10 PLN. Moreover, the service operates all day, so you can easily find a Bolt whenever you need it — whether you're going out or coming back late. The app also provides frequent discounts, making it even more attractive. In addition, the simple registration process and user-friendly interface make it easy for anyone to start using the service right away.
