

1. **Week 2 Assignment: Creating and Customizing Shopify Webshop**
2. Student: Enis Ögdüm

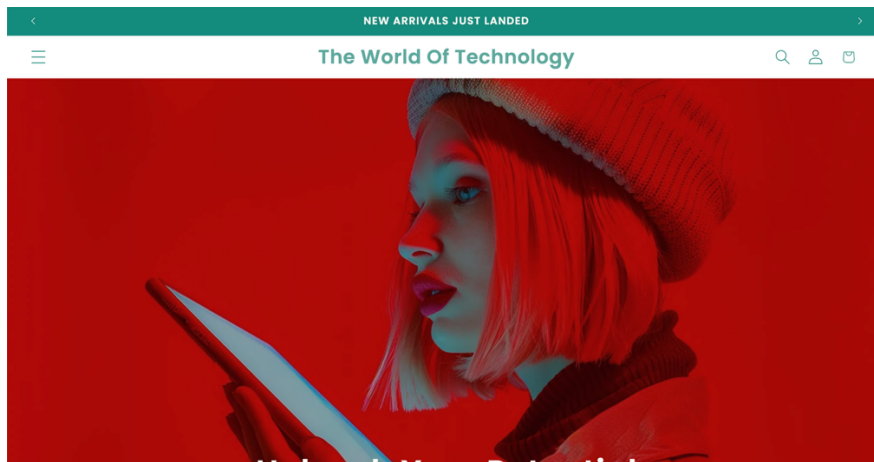

Before everything, I created five different themes to sell products. They are based on the following categories: technology, books, Christmas, winter gear, and coffee. Then, I decided what to sell in each theme — specifically: iPads, *Sherlock Holmes* novels, Christmas souvenirs, coats, and packaged coffee. Now, I am going to investigate each one in order.

Additionally, I added icon pictures and relevant visual elements to make the stores more visually appealing and easier to identify. These icons also help improve SEO performance by making each webshop more findable through better image tagging and thematic consistency.

1- The World of Technology

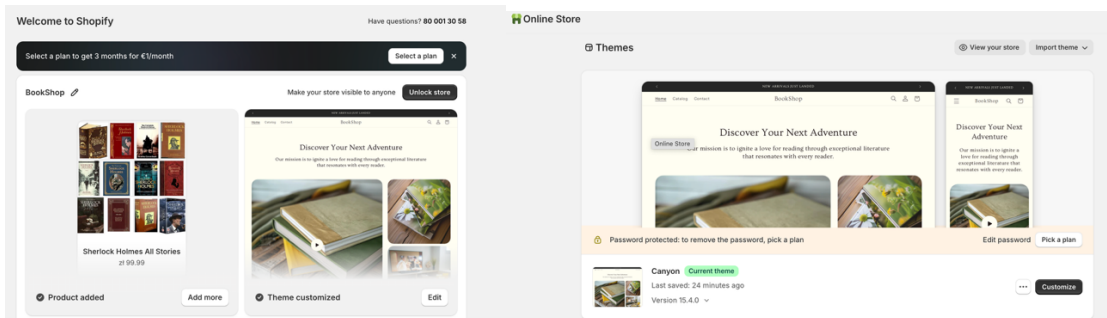

For the **Tech theme**, I decided to sell an iPad 11th Generation. I added the iPad to my store with a price of 1,299 PLN to make it look more attractive instead of 1,300 PLN. To enhance its appeal, I included high-quality photos and a detailed product description. The iPad 11th generation delivers powerful performance with the A13 Bionic chip, enabling smooth multitasking and high-quality graphics. Its 10.2-inch Retina display offers sharp visuals and vibrant colors, ideal for both work and entertainment. With support for Apple Pencil (1st generation) and Smart Keyboard, it enhances productivity and creativity. Advanced cameras and secure Touch ID provide convenience and safety. Designed for seamless integration with iPadOS, this iPad offers a versatile experience for both professional and everyday use.

This expertly curated volume compiles all novels and short stories, offering a comprehensive exploration of Holmes's legendary deductive genius and intricate mysteries. Ideal for enthusiasts and scholars alike, it provides deep insight into Victorian detective fiction and timeless storytelling mastery."
